**GREATER  
SAFETY  
MORE  
CONFIDENCE**

The molded waterproof sole ensures secure mounting. Hi-tech screws hold blades in position, once fitted there is no need for adjustment, you just skate. Steel lacing hooks are stronger and attached in a unique way to make lacing more comfortable. Used with the recommended outside-in lacing method, laces lock feet in position while giving greater flexibility. These 4 Edea innovations combine to give extra strength, better control and greater safety.

**MORE  
CONTROL  
GREATER  
SENSITIVITY**

Great skaters feel the edges and we design to maximize this feel. The thinner sole gives greater sensitivity and a lower center of gravity. Revolutionary heel design increases control and allows deeper leans.

**SHORTER  
BREAK  
IN TIME**

Anatomically shaped boots, lighter and more flexible materials means reduced break-in time. As soon as you lace the boot the memory foam begins to shape to your foot, so after just one session the boots are adjusted.

**INSTANT  
CUSTOM FIT**

Anatomically designed boot gives the perfect fit for every foot. If required our shells can be easily heat adjusted by a skilled technician, giving an instant custom fit. The memory foam lining makes the final adjustment for that personal touch.

7 WONDERS OF **EDEA**

**MORE  
COMFORT**

The new profiles increase the range of movement making skating more fluid. The anatomical shell and heel pocket give natural support without pressure points and the advanced lining added comfort.

**ULTRA  
LIGHTWEIGHT**

Designed with lightness in mind creating increased acceleration, extra maneuverability, added spring and longer 'air time'. Innovation has made our boots the lightest.

**100% ITALIAN  
DESIGN**

From drawing board to ice rink our work is driven by passion, innovation and style. Designed and manufactured at Edea in Italy all our boots come with built-in elegance and quality.

# THE ANTI-SHOCK SYSTEM

When landing a force equivalent to up to **eight times your body weight** spreads throughout your body. These **impact shockwaves** can cause **muscular-skeletal degeneration** and injuries through overtraining. Piano is designed to absorb and disperse these harmful shockwaves.

Two Integrated Noene anti-shock layers and a Poron heel reduce the strain on the body on landing. This means you can execute transitions more quickly adding fluidity to your skating. Additionally the **reduced ice chatter** also gives you a greater feel and a better base to take off from. **Minimizing impacts** and increasing stability. The lateral support **increases power transfer**. The new design means greater range of movements.

# PIANO

## FEATURES:

### **Smoother skating**

Dual layer anti-shock system reduces impact and injury risk while increasing stability.

### **Increase thrust**

New lateral support for quicker, more controlled power transfer

### **More control**

New heel lock keeps foot in place for better feel and quicker movement

### **Comfort**

Longer boot collar

### **Fresh skates**

Micro-perforated air tech lining for super quick drying

## SUPPORT

90 - EXTRA STRONG

## PERFORMANCE

TRIPLE QUAD JUMPS

## NEW FOR 2018

- › **Extra support** and comfort with a new revolutionary tongue
- › **More secure** foot position via refined tongue tabs
- › **Added style** with new 2018 Fashion sole
- › **360° sparkle** with doubled Swarovski® Crystal

# ICE FLY

## FEATURES:

### Ultra modern materials

and design for skaters who like winning.

### Lightness

Lightweight for extra maneuverability and added spring

### Comfort

Extra lateral support for more power transfer.

### Smoother skating

Dual sole reduces vibrations and ice chatter giving greater fluidity on the ice

### Fresh skates

Micro-perforated air tech lining for super quick drying

**SUPPORT**  
85 - EXTRA STRONG

**PERFORMANCE**  
TRIPLE QUAD JUMPS

## NEW FOR 2018

- › **Extra support** and comfort with a completely new tongue design
- › **More secure** foot position through improved tongue tabs
- › **Added style** with new 2018 Fashion sole

Find out more:

# CONCERTO

## FEATURES:

### High performance skating

combined with a traditional look

### More control

Extra lateral support for more power transfer

Stronger tongue for better support

### Smoother skating

Dual sole reduces vibrations and ice chatter

### Added comfort

Longer padded back cuff

### Fresh skates

Perforated anti-bacterial, micro-fiber lining for quick drying

### Style

Sparkling original Swarovski® Crystal with champagne colored heel

## SUPPORT

85 - EXTRA STRONG

## PERFORMANCE

TRIPLE QUAD JUMPS

## NEW FOR 2018

# SIZING, LACING, MOUNTING IN THE EDEA WAY

## SIZING

THE PERFECT FIT  
90% of feet fit our C or standard width. Edea stretchers make the final adjustment to give the perfect custom fit. Non-standard widths are available on special request (B-narrow; D-wide; E-extrawide).

THE PERFECT SIZE  
In order to get the correct length you need to use the Edea measuring device.

## LACING

EDEA BOOTS NEED TO BE LACED PROPERLY FOR PERFORMANCE AND UNLACED AFTER TO MAINTAIN SHAPE.

**a)** Check the lacing. Inside out lacing is essential to hold the foot in place.

**b)** Lacing must be Loose-tight-loose for the correct foot position. Any creases at the instep or ankle could suggest incorrect lacing.

**c)** After skating lace tension must be released all the way down to maintain the perfect fit.

## MOUNTING

EDEA BOOTS HAVE THINNER TECHNICAL SOLES AND NEED SPECIAL TOOLS AND HI-LOW SCREWS FOR MOUNTING THE BLADE.

### ONE DRILL BIT EXTENSION 2,5 MM.

Specially measured drill bit holder ensures accurate depth of holes. 2,5mm drill bits are used to allow Hi-Low screws maximum hold.

### SET OF 100 HI-LOW SCREWS

Flat Round

### PRE-CUT CARBON FILLER

Essential for repositioning blades. Each pack includes 25x 2,5mm pre-cut carbon bars.

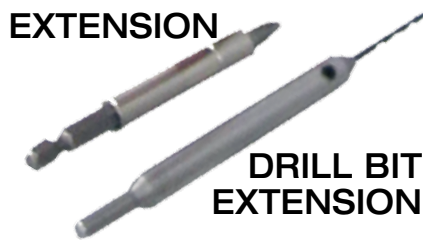

## MOUNTING STAND

STANDS FOR QUICK AND PRECISE BLADE MOUNTING ARE PRACTICAL AND PORTABLE.

EXTENSION

DRILL BIT EXTENSION

### SPECIALIST KIT

(manual mounting stand+drill bit+ Hi-low screws+ carbon filler+ apron)

### PROFESSIONAL KIT

(pneumatic mounting stand +drill bit +Hi-low screws +carbon filler +apron)
